PROFILE

I'm a Full-Stack Developer with 2+ years of hands-on experience developing dynamic, scalable web applications using Angular, ASP.NET, and MSSQL. I thrive at the intersection of clean code and intuitive design, delivering robust solutions that align with both business goals and user needs. From building internal tools that enhance team efficiency to crafting customer-facing applications, I bring a user-centered mindset and a collaborative approach to every project.

WORK EXPERIENCE

SOFTWARE ENGINEER 1

- Implemented new features and enhanced application functionality based on evolving client requirements.
 - Contributed to improving system performance, UI responsiveness, and application stability.
 - Supported the development and deployment of new features in both backend and backend environments.
 - Worked collaboratively in cross-functional teams to deliver high-quality software under tight deadlines.
 - Participated in code reviews, debugging, and resolving issues to ensure optimal application performance.
-
